Summary

Backend Engineer with 2.5 years of experience building scalable and performance-driven backend systems using Java and Spring Boot. Experienced in designing REST and GraphQL APIs, developing microservices-oriented solutions, optimizing SQL/PostgreSQL workloads, and supporting enterprise financial platforms. Strong foundation in SDLC ownership, clean architecture, debugging, production reliability, and high-quality software delivery.

Experience

Analyst (Backend Developer), Deloitte

Dec 2024 – Present

Client: Vanguard (Global Asset Management Platform)

- Engineered 5+ scalable REST APIs using Java and Spring Boot to support high-volume financial transaction workflows.
- Designed and developed reactive backend services using Spring WebFlux, improving responsiveness under concurrent load.
- Built and optimized 5+ GraphQL APIs, enabling efficient data retrieval and improved frontend consumption.
- Contributed to SHIM integration connecting 3+ legacy systems with modern microservices-oriented architecture.
- Reduced database latency by 25% through query refactoring, indexing strategies, and performance tuning.
- Improved release quality by maintaining 90%+ unit test coverage using JUnit and Mockito.
- Investigated and resolved critical production incidents (P1/P2) through root cause analysis and remediation.
- Participated across full SDLC lifecycle including requirement analysis, design, development, testing, deployment, and post-production support.
- Collaborated with Product, QA, and cross-functional teams to deliver reliable backend components aligned with business goals.

Analyst Trainee, Deloitte

Nov 2023 – Nov 2024

- Contributed to implementation and enhancement of 8+ backend APIs using Java and Spring Boot.
- Developed REST and GraphQL APIs following secure coding standards and enterprise design practices.
- Strengthened application reliability through unit testing, debugging, and peer review collaboration.
- Participated in Agile sprint cycles, technical discussions, and feature estimations.

Projects

Personal Finance Tracker API

May 2025 – Present

- Built a scalable RESTful backend platform to manage expenses, income, categories, and monthly summaries.
- Designed modular layered architecture following clean code and maintainability principles.
- Implemented JWT-based authentication and role-based authorization for secure API access.
- Designed normalized relational schemas using PostgreSQL and MySQL with Spring Data JPA.
- Integrated Swagger/OpenAPI for API documentation and testing workflows.
- Containerized the application using Docker with environment-specific configuration profiles.
- Developed unit and integration tests to ensure reliability and maintainability.

Skills

- **Languages:** Java, JavaScript, SQL
- **Frameworks:** Spring Boot, Spring WebFlux, Hibernate, ReactJS
- **API Technologies:** REST, GraphQL
- **Databases:** PostgreSQL, MySQL
- **Tools:** Git, GitHub, Docker, Postman, Swagger, Maven, JIRA
- **Concepts:** Microservices Architecture, SDLC, OOP, SOLID Basics, Reactive Programming, JWT Security, REST API Design, Performance Optimization
- **Methodologies:** Agile / Scrum

Education

Zeal College of Engineering and Research, Pune

2019 – 2023

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.9 / 10

Awards

- APPLAUSE Award – July 2024
- APPLAUSE Award – December 2024
- SPOT Award – May 2025
