Summary

Software Engineer with 2.5 years of experience developing scalable backend applications using Java and Spring Boot. Experienced in REST APIs, GraphQL, microservices, SQL optimization, reactive programming, and full software development lifecycle. Strong understanding of object-oriented programming, distributed systems fundamentals, Agile methodologies, and backend application performance optimization.

Experience

Software Engineer | Deloitte

Nov 2023 – Present

Client: Vanguard – Financial Services Platform

- Developed and maintained 10+ REST and GraphQL APIs using Java and Spring Boot for enterprise financial applications.
- Built reactive backend services using Spring WebFlux, improving API responsiveness and concurrent request handling.
- Contributed to microservices-based integration of 3+ legacy applications using SHIM services to support distributed system communication.
- Reduced database query execution time by approximately 25% through SQL query optimization and indexing improvements.
- Enhanced GraphQL APIs to improve frontend data retrieval efficiency and reduce unnecessary payload transfer.
- Developed reusable backend modules and business logic components following object-oriented design principles and clean coding practices.
- Wrote unit and integration test cases using JUnit and Mockito, maintaining high code quality and improving application reliability.
- Participated in debugging, issue resolution, deployment support, and production monitoring activities across multiple sprint releases.
- Collaborated with QA, DevOps, business analysts, and on-site stakeholders in Agile development environments.
- Participated in peer code reviews, sprint planning, technical discussions, and SDLC activities to ensure timely feature delivery.

Projects

Personal Finance Tracker API

May 2025 – Present

- Developed a scalable backend application for expense tracking and budget management using Java and Spring Boot.
- Designed RESTful APIs for managing transactions, categories, monthly reports, and user authentication.
- Implemented JWT-based authentication and role-based authorization for secure API access.
- Integrated PostgreSQL and MySQL databases using Spring Data JPA and Hibernate.
- Containerized the application using Docker to support consistent local development and deployment workflows.
- Added Swagger/OpenAPI documentation for API testing and developer usability.
- Developed unit and integration tests to improve maintainability and application stability.

Skills

- **Languages:** Java, SQL, JavaScript
- **Frameworks & Technologies:** Spring Boot, Spring MVC, Spring WebFlux, Hibernate, JPA, ReactJS
- **Frontend:** HTML, CSS, JavaScript
- **API Development:** REST APIs, GraphQL, Microservices
- **Databases:** PostgreSQL, MySQL
- **Tools:** Git, GitHub, Docker, Maven, Postman, Swagger/OpenAPI, JIRA
- **Testing:** JUnit, Mockito, Unit Testing, Integration Testing
- **Concepts:** OOP, SDLC, Agile/Scrum, Distributed Systems Basics, SQL Optimization, API Integration, Design Patterns, Backend Development

Education

Zeal College of Engineering and Research, Pune

2019 – 2023

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.9 / 10

Awards

- APPLAUSE Award – July 2024
- APPLAUSE Award – December 2024
- SPOT Award – May 2025
